Dashboard: monitor tasks, warnings and herd performance (video)

Dashboard · https://www.uniform-agri.com/knowledge-base/uniform/dashboard/dashboard-monitor-tasks-warnings-and-herd-performance-video/

This movie explains the latest functionality that you can find in your version 5 **Dashboard**. We show how you can produce and quickly print off a list of all the cows in a particular status. We show the new warning thresholds on the **Action Lists**, so you can highlight cows where events are now overdue. We also explain how you can use and customise the **Tasks** section for your individual farm so for example you can see all the cows requiring a routine foot trim and all the calves requiring vaccinations. Finally we show where you can select the most important key performance indicators for your farm so that you have a one screen report showing you actions that are required, actions that are overdue and how the herd is performing.
