Adding inseminators and review results

Data entry · https://www.uniform-agri.com/knowledge-base/uniform/data-entry/adding-inseminators-and-review-results/

If there are several inseminators on the farm, then it can be useful to record and monitor. Here, we will give you a short explanation of the settings and where you can see the check the results later.

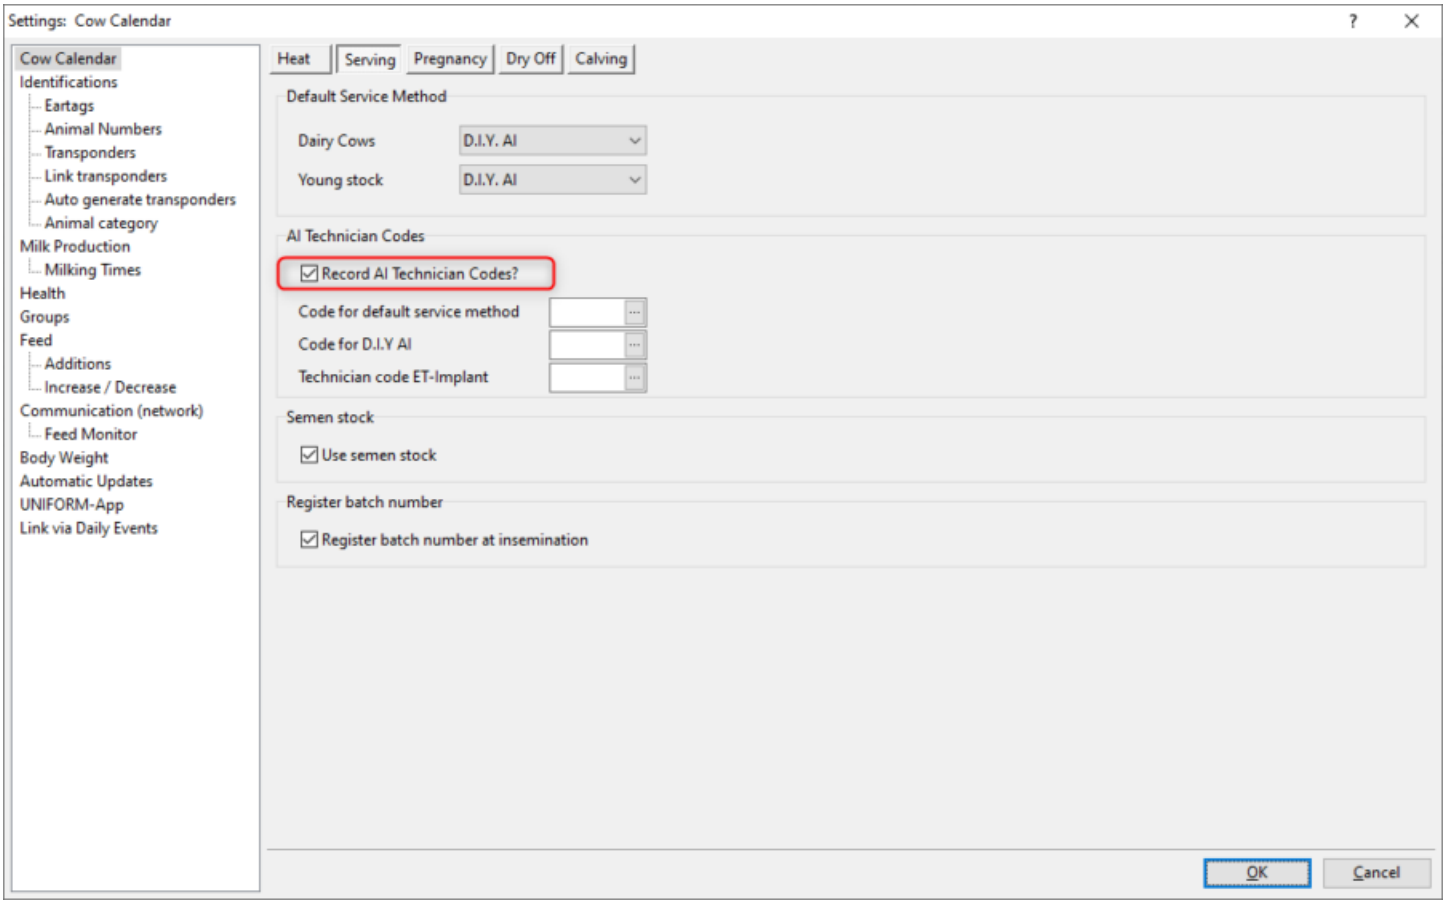

Step 1: Go to 1.9 Supplier list

In the **Supplier List**, the inseminators must be added. To do so click **[New]** at the bottom left and make sure to enter something in the fields **Name** and **Herd Number** and that below **Type** the box is ticked for **[Operator]**. Finally, click on **[OK]**:

Step 2: Go to system Settings-General settings

Then you go to **[Cow calendar]** and the tab **[Serving]** and make shure that this box is ticked:

You can fill in the three entry fields below if you have a specific preferred code / inseminator

Step 3: Entering insemination (s) at Daily entry

From now on, when you enter an **insemination** in **daily events**, there will be an item added at the end: the **inseminator code**. There you can add the inseminator (code) for each breeding.

Step 4: Review results

If you've been working with entering inseminatons for a while in this way, then it is also be useful to see the results. Go to **3.11 Fertility KPI's (US)**. In the second tab, the **[Conception Rate]**, it is possible to group by **inseminator code** (bottom left). Also in **3.7 Insemination analysis** under the button **[Summary]**, the results per inseminator will be shown.
