How to use your own bull as a service bull?

Bulls & breeding · https://www.uniform-agri.com/knowledge-base/uniform/bulls-breeding/using-your-own-bull-as-a-service-bull/

If you would like to use your own bull for the insemination options, **[Natural service]** or **[With bull]** it must be set up correctly in the program. This is also relevant if you have bought a new bull.

The steps below will show how to set up this feature:

Firstly, you go to the **Animal Record** of the bull, then go to the **[General]** tab [1] and click on **[Edit]** [2]. In this overview you go to the second tab, **[Pedigree details]** [3] and tick on the box **[Use as service bull]**. See below:

and select **[OK]** in the bottom right corner.

The bull will now be available as a breeding bull in the program for cows.
