# Entering pregnancy status – Twins

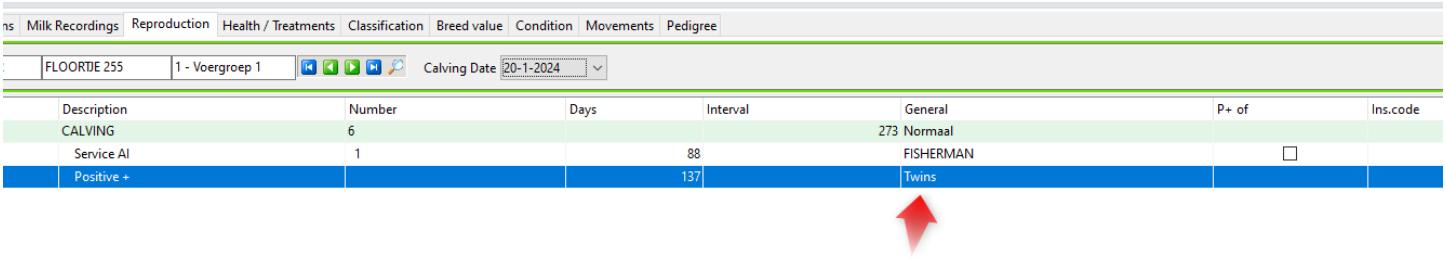

Fertility & reproduction · https://www.uniform-agri.com/knowledge-base/dairy/fertility-reproduction/how-to-record-twin-pregnancies-in-uniform/

After the latest update, it is now possible to enter the number of calves determined during scanning when entering a **pregnancy status**. Below is an explanation of how to enter this information and where you can find it later.

1. Go to **[Daily Entry]** and select the relevant cow.
2. Under **Action**, choose **[Pregnancy Status]**.
3. When entering the value **[Positive +]**, you can now specify the number of calves. In this example, it is a twin.

Afterward, the mark **Twins** will appear in several overviews in the UNIFORM software. For example, on the **Animal record** under **[Reproduction]**:

You will also find the mark on various **Attention lists**, such as the **Calving list** or the **Dry-off** list. This is how it will be displayed:
