Health Event Analysis by Days in Milk

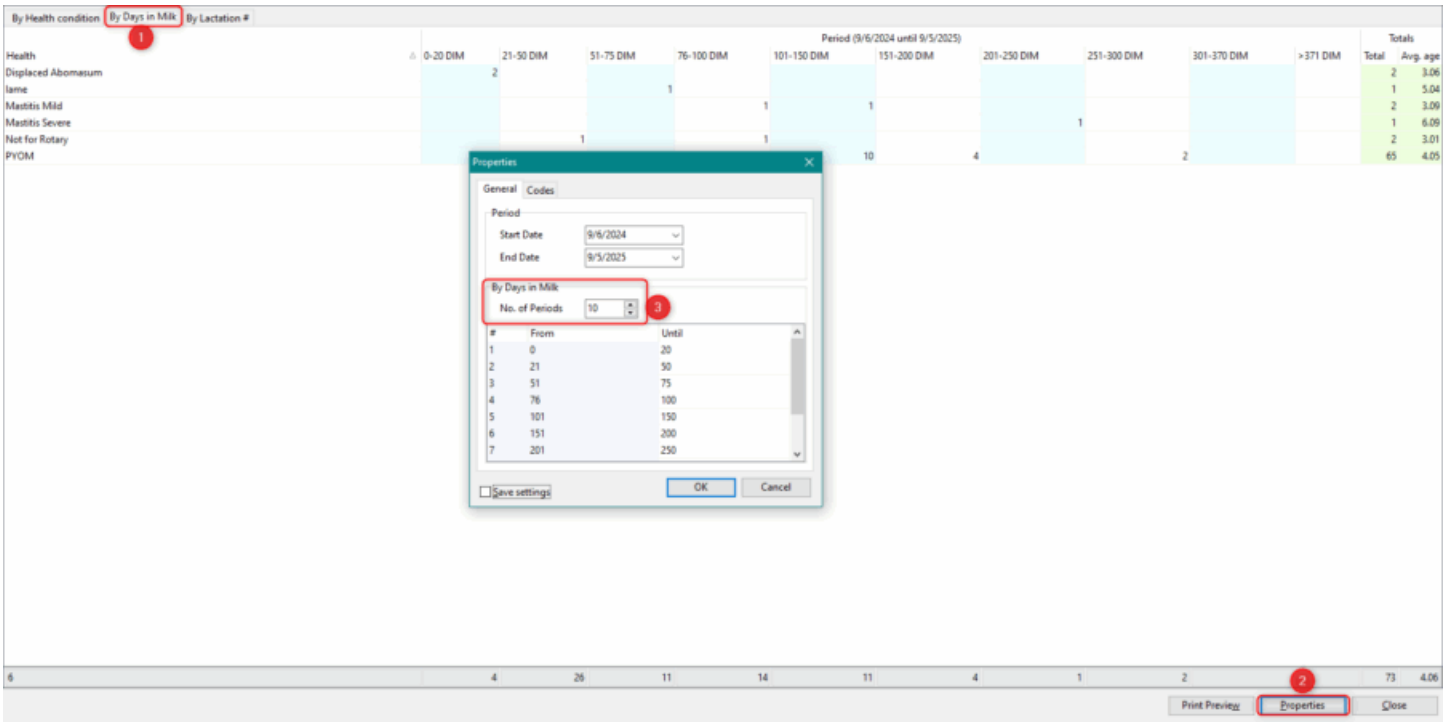

Health · https://www.uniform-agri.com/knowledge-base/uniform/health/health-event-analysis-by-days-in-milk/

It’s very useful to regularly review which health events occur and how they relate to the stage of lactation. In this tip, we’ll show you how to visualize this information.

Click the buttons below to access **4.34 Health Event Analysis**:

Here, you’ll see at a glance all recorded health events from the past year, displayed by month. You can also view the health events by **parity** and **stage of lactation** (1). Let’s take a closer look at the latter:

You can increase the number of periods. To do this, go to **[Properties]** (2) and use the arrows next to **Number of periods** (3).

You will then see the number of health events per period. In this example, it’s clear that **Pyometra** is the biggest concern. By clicking on the i, you can see exactly which animals are involved.

To spread out the days in milk even further, you can use up to 20 periods. You can also adjust the period length by changing the date.
